

About us

At Artemis group of companies, we take pride in over 20 years of delivering excellence. As a professionally managed organization, we specialize in providing end-to-end solutions for a wide range of industries across the nation

We offer cutting-edge solutions in:

- **Civil and Infra Structure Solutions**
- **HVAC**
- **Low Voltage Wiring and Switching**
- **Fire Alarm System**
- **Public Address System**
- **Gas Detection System**
- **Water Mist & Sprinkler System**
- **Gas Suppression System**
- **CCTV & Access Control**
- **EPABX**
- **LAN Networking and Wi-Fi**
- **Building Management System**

Our comprehensive, tailored approach ensures that every project is handled with the utmost expertise and precision, providing our clients with the highest standards of safety and reliability.

Why Choose Us?

Expertise and Experience

Our team is highly skilled and experienced in fire protection projects, ensuring that we provide reliable and effective solutions tailored to your needs.

High Quality Solutions

We use top-tier equipment from leading manufacturers, ensuring reliable, effective, and cutting-edge protection.

Customized Approach

We tailor our solutions to meet your unique needs, ensuring optimal protection. From initial consultation to final installation, we work closely with you to deliver a perfect fit.

Comprehensive Services

From detailed assessments to custom design, we offer a full range of services to address every aspect of fire safety.

Adherence to Standards

We follow international safety standards, ensuring that all our solutions meet or exceed global best practices.

Timely and Efficient

We are committed to completing projects on time and within budget, providing you with peace of mind throughout the process.

Client Satisfaction

Artemis Group serves a diverse clientele , private corporations, real estate developers, and public institutions. We collaborate with world-class clients who uphold high standards of professionalism and have clear, defined goals for their projects. Our ability to deliver quality construction and integrated MEP solutions has led to strong client relationships and a high rate of repeat business — a testament to the trust and satisfaction our clients place in us.

Project Diversity

Artemis Group specializes in the construction and complete MEP execution of a wide range of projects, including office buildings, retail and commercial centers, industrial facilities, hospitals and healthcare centers, infrastructure, and educational institutions, as well as storage and warehousing complexes. Our expertise covers end-to-end solutions in both civil construction and MEP systems, ensuring integrated, high-performance project delivery.

SOME OF THE DIVERSE PROJECTS ARTEMIS HAS DELIVERED ARE:

Office Buildings and
Office Centers

Industries

Warehouses

Restaurants

Schools and
Educational Facilities

Hotels

Hospitals

Distilleries

Commercial and
Public Space

Our Experience in Construction

Artemis Group's turnkey solutions and services offer many advantages to our clients. Our team of in-house Architects, Engineers, Project Managers and support staff can design, build and manage your entire project from start to finish. Our turnkey services save our clients time, money and gives them the highest quality and control of their projects

CIVIL WORKS

All types of heavy foundation and structural works, shore civil works, large excavation works, High volume backfilling works, etc

BUILDING

Reinforced concrete, precast and steel structures, as well as prefabricated and pre-engineered buildings for residential and commercial units for public and private Sectors.

SITE FACILITIES

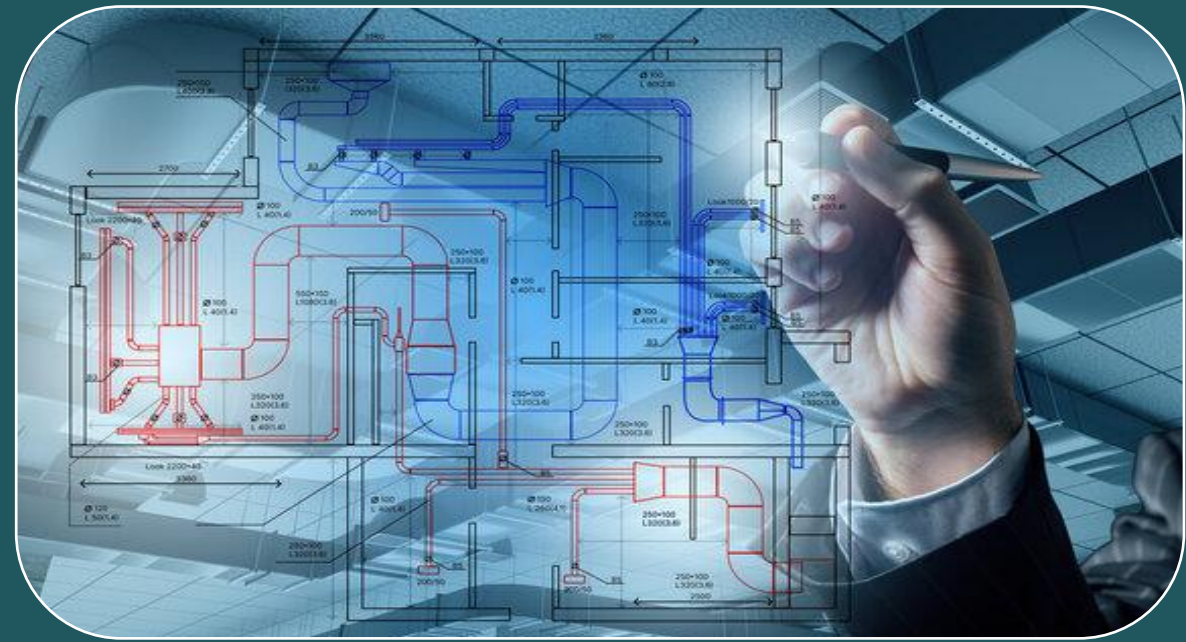

Temporary and permanent; Camps, Offices, Warehouses, Workshops and Laydown Yards

Artemis Group's turnkey HVAC services provide efficient, reliable, and cost-effective climate control solutions tailored to each project. Our in-house team of Mechanical Engineers, HVAC Designers, Project Managers, and technicians can design, supply, install, test, and commission complete HVAC systems from concept to completion. Our integrated approach helps clients save time and cost while ensuring high-quality execution and system performance.

HVAC SYSTEMS:

Design and installation of centralized HVAC systems, including chilled water systems, VRF/VRV units, DX systems, and split systems for commercial, residential, industrial, and healthcare facilities.

Our Expertise in HVAC Projects

CONTROLS & AUTOMATION:

Integration with BMS (Building Management Systems) for efficient monitoring and control, energy optimization, and seamless operation of HVAC systems.

AIR DISTRIBUTION:

Complete ducting systems using GI and pre-insulated ducts, air outlets, dampers, louvers, and sound attenuators — ensuring optimal air quality, thermal comfort, and noise control

VENTILATION & EXHAUST:

Fresh air systems, toilet and kitchen exhaust, car park ventilation systems with CO monitoring, stairwell pressurization, and smoke extraction systems designed to meet international safety and comfort standards.

Fire Alarm Systems

Artemis Group provides comprehensive fire detection and alarm system solutions tailored to meet the safety and compliance requirements of each project. Our experienced team of Fire Protection Engineers and Technicians ensures the design, supply, installation, testing, and commissioning of fully integrated fire alarm systems in accordance with local and international standards.

We specialize in:

Conventional and Addressable Fire Alarm Systems

Custom-designed for a wide range of facilities, from small buildings to complex, multi-zone installations.

Fire Detection and Notification Devices

Smoke detectors, heat detectors, manual call points, alarm sounders, and strobe lights with intelligent integration.

Control Panels and Networked Systems

Smart fire alarm control panels with remote monitoring and centralized control capabilities.

Voice Evacuation Systems

Public address and emergency communication systems for clear, effective evacuation instructions.

Integration with Life Safety Systems

Seamless interfacing with firefighting systems, HVAC shutdown, access control, and building management systems.

PA System

Artemis Group offers complete Public Address and Voice Evacuation System solutions designed to deliver clear, reliable communication across various facility types. Our systems are engineered to meet the operational and safety needs of modern buildings, industrial facilities, and large-scale infrastructure.

We provide end-to-end services including system design, supply, installation, integration, testing, and commissioning. Whether it's routine announcements or emergency broadcasting, our PA systems ensure effective communication at all times.

We specialize in:

Zoned PA Systems

Multi-zone audio distribution for targeted or all-area announcements, suitable for large buildings and complexes.

Voice Evacuation Systems

Integrated with fire alarm systems to provide automatic, clear voice instructions during emergencies.

Digital and Networked PA Solutions

IP-based systems allowing centralized control, remote access, and integration with building management systems.

Industrial and Harsh Environment Systems

Explosion-proof and weatherproof PA systems designed for oil & gas, marine, and heavy industrial environments.

Custom Speaker Layout and Acoustic Planning

Precision planning for optimal sound clarity across different environments—from offices and warehouses to public spaces.

Gas Detection System

Artemis Group delivers advanced Gas Detection System solutions to safeguard people, assets, and environment across a wide range of industries. Our systems are engineered for early detection of hazardous gases, helping to prevent accidents, ensure compliance, and support safe operational continuity. From design to commissioning, our team provides turnkey gas detection services tailored to the unique needs of each site—whether industrial, commercial, or residential.

We specialize in :

Fixed and Portable Gas Detection Systems

Deployment of both permanent and mobile detectors for continuous monitoring in critical zones.

Toxic and Combustible Gas Monitoring

Detection of gases such as LPG, methane, carbon monoxide, hydrogen sulfide, and oxygen deficiency.

Integrated Control Panels

Centralized gas detection control units with visual/audible alarms, system diagnostics, and real-time alerts.

Zone Classification and Hazard Area Design

Gas detection solutions designed in compliance with ATEX, IECEx, and other international safety standards.

System Integration

Seamless interface with fire alarm systems, HVAC shutdown, ventilation control, and plant emergency systems.

Calibration and Maintenance Services

Regular system calibration and preventive maintenance to ensure reliability and long-term safety.

Water Mist & Sprinkler System

We offers comprehensive Water Mist and Sprinkler System solutions to protect life and property through effective fire suppression. Our systems are designed in accordance with international fire safety standards and are tailored to suit the specific requirements of each facility—ensuring maximum efficiency, reliability, and code compliance. We manage every phase of the system lifecycle, from design and hydraulic calculations to installation, testing, commissioning, and maintenance.

We specialize in :

Automatic Sprinkler Systems

Wet, dry, pre-action, and deluge sprinkler systems for commercial, residential, and industrial applications.

High and Low-Pressure Water Mist Systems

Environmentally friendly fire suppression systems ideal for areas where minimal water damage is critical (e.g., data centers, hospitals, museums, and electrical rooms).

Fire Pumps and Water Storage Solutions

Integration of fire pump rooms, jockey pumps, and water tanks designed for uninterrupted flow and pressure.

Zoning and Flow Control

Intelligent zoning and valve control systems for targeted fire suppression and system efficiency.

Compliance with NFPA, FM, and UL Standards

Systems designed and installed to meet the highest international standards and local authority regulations.

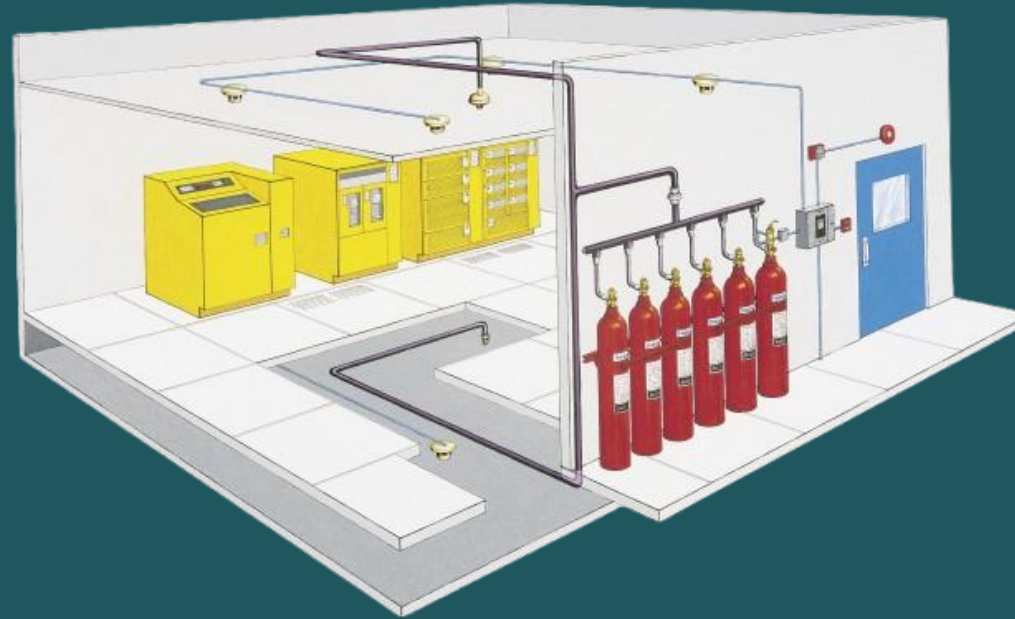

Maintenance & Testing Services

Regular inspection and servicing to ensure long-term functionality and readiness in emergencies.

Gas Suppression System

Artemis Group provides advanced Gas Suppression System solutions designed for rapid fire extinguishing in critical environments where traditional water-based systems are not suitable. Our systems protect valuable assets and ensure business continuity by suppressing fires cleanly and efficiently—without causing damage to sensitive equipment.

We deliver fully integrated, turnkey gas suppression solutions, from design and engineering to installation, testing, and commissioning

We specialize in:

Clean Agent Suppression Systems

Systems using FM-200, NOVEC™ 1230, or similar agents ideal for data centers, control rooms, archives, and telecom facilities.

Inert Gas Systems

Environmentally friendly options such as IG-55, IG-541, and IG-100 that suppress fire by oxygen displacement without harming occupants or equipment.

CO₂ Suppression Systems

High-pressure or low-pressure carbon dioxide systems for industrial applications, including electrical panels, turbines, and generator rooms.

Total Flooding & Local Application Systems

Engineered for both enclosed room protection and direct discharge on high-risk machinery or components.

Detection, Control & Release Panels

Intelligent control systems integrated with fire alarm detection and automated agent release functions for fast, reliable response.

Compliance & Safety

Systems designed in accordance with NFPA, ISO, and local authority standards, ensuring complete compliance and operational safety.

EPABX

EPABX & LAN SYSTEMS

Artemis Group delivers reliable and scalable EPABX (Electronic Private Automatic Branch Exchange) solutions designed to streamline internal and external communication within organizations of all sizes. Our systems offer seamless voice connectivity, call management, and integration with other communication platforms—supporting operational efficiency and business continuity.

We specialize in :

EPABX (Electronic Private Automatic Branch Exchange) Systems

Analog, Digital, and IP EPABX Solutions

Customized telephone exchange systems supporting internal and external voice communication needs.

Multi-Branch & Remote Connectivity

Unified communication across multiple sites through IP telephony and SIP trunking.

Integration with PA and Intercom Systems

Seamless interfacing with public address and internal intercom solutions.

CCTV and Access Control Systems

We are a trusted provider of cutting-edge and economically sustainable CCTV and Access control systems that ensure robust surveillance and enhanced security. Our solutions are designed to deliver high performance while optimizing costs, making advanced surveillance accessible to a broad range of clients.

Our Services Include:

- **Affordable High-Definition CCTV Systems**
- **Scalable Networked Surveillance**
- **Integrated Access Control Systems**
- **Customizable Solutions for Budget Optimization**

Artemis Group is committed to delivering cutting-edge security solutions that strike the perfect balance between performance and cost efficiency.

LAN & Wi-Fi Networking

We design and deploy reliable LAN and Wi-Fi networks tailored to your workspace. As a project-based company, we manage the full process — from structured cabling to secure wireless coverage — ensuring fast, stable, and scalable connectivity across your office.

Our Services Include:

- LAN Setup & Structured Cabling
- Wi-Fi Network Design & Installation
- Access Point Placement & Configuration
- Network Security & Performance Optimization

We pride ourselves on being a fully project-driven company that takes complete ownership of your LAN and Wi-Fi network from initial design to final deployment. Our customized approach ensures your network perfectly fits your workspace and user needs, while prioritizing security, scalability, and performance. With meticulous planning and expert execution, we minimize downtime and disruptions, delivering reliable connectivity that supports your business growth. Choosing Artemis Group means partnering with a dedicated team committed to seamless, future-ready network solutions tailored just for you.

Building Management System (BMS)

At Artemis Group, we specialize in providing cutting-edge Building Management Systems (BMS) that integrate all building systems to enhance energy efficiency, operational performance, and occupant comfort. Our BMS solutions offer comprehensive control over lighting, HVAC (heating, ventilation, and air conditioning), security, fire safety, and other essential systems in a building.

Why Choose Us?

Energy Savings: We provide solutions that Optimize energy use, reduce costs, and improve building efficiency.

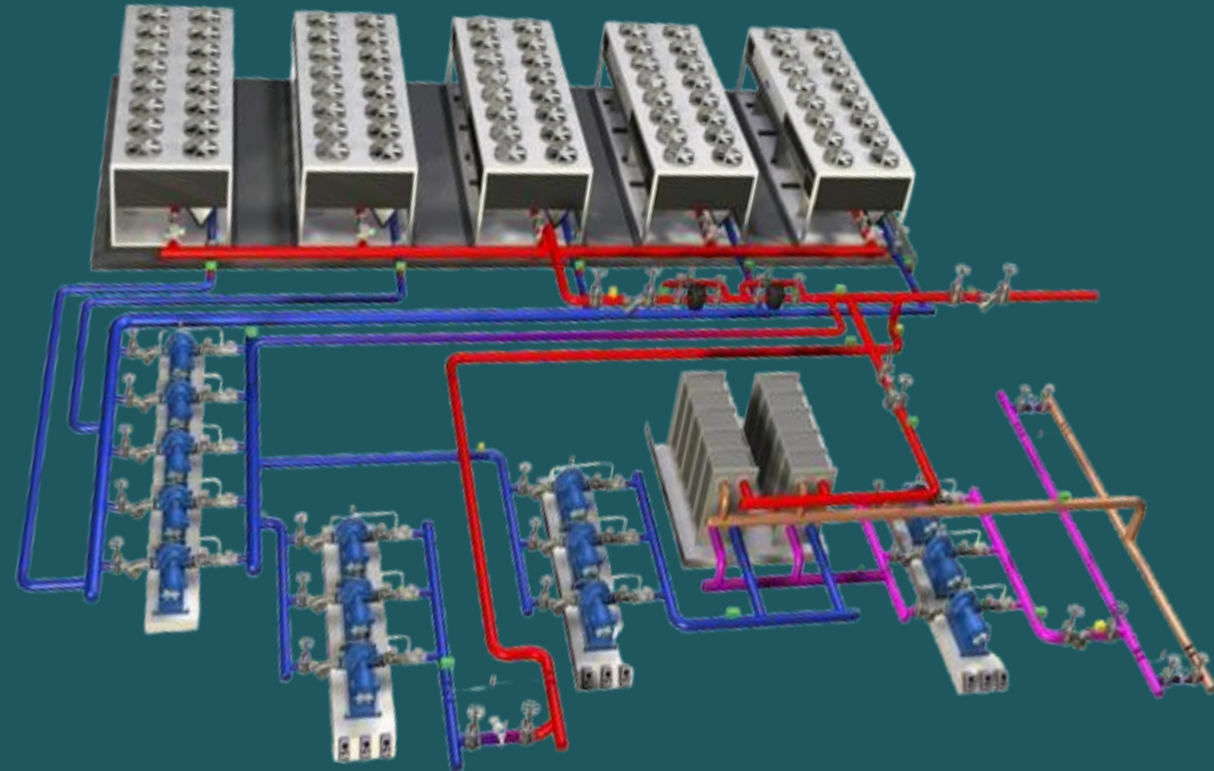

Comfort and Safety: We ensure a comfortable and secure environment for building occupants.

Centralized Control: Monitor and control all systems from one interface.

Sustainability: We help buildings reduce their environmental impact and carbon footprint.

Our Services include :

- BMS Design and Installation
- Ongoing Support
- Energy Optimization.
